

## Application

HiTEC® 385 premium gear oil additive is designed to maximize the flexibility of blending operations involving automotive, automotive limited slip, commercial gear, industrial gear, greases and other industrial lubricants. This additive has been particularly valuable when used in gear lubricants sold in quick-lube establishments where the performance in a very high number of different makes of vehicles has reduced or eliminated customer concerns such as limited-slip squawk.

---

## Key Performance Benefits

- Data and approvals in most US base oils
  - Long history of reliable performance
  - Strong foam suppression
  - Soluble in Group I and II base stocks
- 

## Typical Characteristics

Appearance: Clear amber liquid

Specific Gravity @ 15.6/15.6°C: 1.027

Density, lbs/gal.: 8.55

---

Viscosity @ 100°C, cSt: 15

Flash Point, °C: 82 min.

## Handling Information

---

Max Handling Temp: 40°C

Shelf Life: Up to 12 months @ 25°C

## Recommended Dosage
